MOMTWH3/4IPS Tankless Water Heater Hot/Cold Service Valves

Use: For use in potable water distribution systems for water flow control. Valves connect directly to coldwater inlet and hot water outlet of the tankless water heater. Use for appliance maintenance and emergency shut-off.

Design Features:

- **Compact design** ideal for recessed and cover box installations
- **Captive coupling nut & washer** reduces opportunity for component loss making installation easier
- Captive washer won't kink or tear during installation
Forged, one-piece construction reduces the potential for pinhole leaks
- Integrated drain valve with independent, ¼ turn operation allows quick system diagnostic testing and maintenance
- Built-in side port for the pressure relief valve reduces the number of connections & simplifies the installation
- Right-sized handles, color-coded for immediate system identification Perfect for tight installations
- 100% Lead Free for potable water
